

CALCULATING SHIPPING / HANDLING TOTALS IN THE HOME AND SCHOOL SOLUTIONS PAYPAL SHOPPING CART SYSTEM

This chart is provided for those who wish to know how shipping/handling costs (SHIP1 and SHIP2) are calculated in the PayPal shopping cart system on the Home and School Solutions website as of January 2017. Using this information you will be able to quickly calculate what the shopping cart totals will be if you purchase one or two copies of a product by clicking Add to Cart buttons. Please contact me for the current shipping/handling cost if you want 3 or more copies of each item. (See next paragraph.)

This system is not perfect also because it cannot tell us exactly what Canada Post would charge for a package made up of a combination of different items to your precise location. Nor does it allow you to select a specific shipping method. Therefore, I will be very happy to personally calculate a precise shipping/handling amount for your order—just ask! (Visit the [About Home and School Solutions Section Map](#) for contact information.) Once your final total is agreed upon I can send you a Buy Now button or you can use PayPal's Send Money feature to make your payment. This is exactly what I do for my international customers!

NOTE ON SHIPPING: I have chosen to use the most economical shipping services, which vary according to size, weight and destination of an item. To Canadian destinations, services are always either Regular Parcel (Reg Parcel) or Lettermail. But to continental U.S. destinations, they could be Small Packet Air (Sm Pac Air), Light Packet, Expedited Parcel (Expedit Par) or Letter Post.

NOTE ON INSURANCE: Parcels and packages include insurance up to \$100, either as a Canada Post default or because I have added it. Lettermail and Letter Post DO NOT include insurance because Canada Post does not provide it for simple envelopes. If you want insurance for an envelope, it would have to be sent in a parcel or package. If you want extra insurance, please let me know. As of June, 2017, insurance was \$9.

NOTE ON "US" and "CAN" designations in the ESTIMATED SHIPPING column: Every product is listed twice—the first line is for the item shipped to a Canadian destination, and the second line is for the item shipped to a continental U.S. destination. The "CAN" designation refers to Canadian shipping costs (to Yukon Territory) and the "US" designation refers to continental U.S. shipping costs (to Washington state). Please note that all dollar amounts are listed in CANADIAN DOLLARS.

NOTE ON Reproducibles, PDF's (e-mailed), and document templates (e-mailed): Although I have calculated costs for shipping one or two copies of each item (for the sake of consistency), you do not need more than one of each. You are, however, certainly welcome to purchase more!

NOTE ON USING THE CHART TO DETERMINE TOTAL SHIPPING/HANDLING AMOUNT FOR ONE OR TWO COPIES OF AN ITEM: The shipping/handling amount for 1 copy of an item is SHIP1, which includes the estimated shipping cost plus PayPal fees. To calculate the shipping/handling amount for two copies of the same item, simply add SHIP2 to SHIP 1. For example, the shipping fees to purchase two copies of MTL5—CC would be SHIP1 plus SHIP2. For a Canadian destination SHIP1 = \$20.99 and SHIP2 = \$3.86, so the total would be \$20.99 + \$3.86 = \$24.85. For a continental U.S. destination SHIP1 = \$21.11 and SHIP2 = \$12.46, so the total would be \$21.11 + \$12.46 = \$33.57. PayPal makes these calculations for you automatically.

NOTE ON ITEM DETAILS: The information provided in the chart is for just one copy of an item. For example, one RICH1-P weighs 200g, fits into a 9" x 12" envelope, and goes by either Lettermail or Letter Post. While dimension and weight details are not provided on this chart for packages containing two copies of an item, the SHIP2 amount does take into account the extra weight and different dimensions, etc.
